AWS Hybrid Cloud Assessment (MAP* Assess)

Migration Acceleration Programme

Assess your approach to the cloud.

Running workloads in the Cloud can provide significant benefits, driving flexibility, agility, and scale. However, the journey to the Cloud can be complex with many projects stalling due to challenges encountered while undertaking the task.

By using the Insight AWS Hybrid Cloud Assessment service, your organisation can simplify workload migrations by evaluating existing infrastructure and creating an optimised cost and approach for migrating workloads to the AWS cloud. The assessment brings together a workload migration assessment, consultative workshops, planning, and a migration readiness assessment into a complete and detailed analysis report.

No matter where you are on your journey, we will help you identify the right path to achieve your AWS cloud goals.

Benefits

- Expert guidance from Insight's certified AWS and Microsoft specialists.

- Provide an optimised migration and hosting approach enabling a clear business case based on accurate TCO.

- Gain further insights into server, application, and database requirements.

- Aligns with the AWS MAP* Assess funding programme (Fully funded offering - pending registration approval)

- Lower migration and cloud costs.

- Accelerate migration and cloud adoption.

- Create a modernisation vision and tailored migration roadmap while adhering to best-practice.

- Reduce risk and impact on migration projects.

* The AWS Migration Acceleration Program (MAP) is a comprehensive and proven cloud migration program based upon AWS's experience migrating thousands of enterprise customers to the cloud.

aws

Business challenge

Today, many businesses recognise the AWS Cloud as an established platform for delivering key services. AWS Cloud provides agility, flexibility, scale, and potential cost advantages. However, building the business case for the Cloud can be challenging, A holistic approach is required; people and processes may need to evolve, costs need to be predictable as Cloud usage scales both up and down, we need confidence that data is secure and protected from threats.

A lack of expertise in this key area within the business can prove a real hazard to your successful cloud migration, deployment and benefits.

To ensure you realise this huge potential, you need to assess your requirements and the benefits offered by AWS. However, getting it right requires a wealth of AWS experience and expertise. Without the required specialised knowledge, there is a real risk of implementing a migration that doesn't deliver on its promises.

Our Solution

Our AWS Hybrid Cloud Assessment is a strategic, structured service delivered by our AWS experts and designed to help organisations that need to build a business case for investment approval and planning the optimal route to the public cloud. The assessment evaluates your existing infrastructure and creates an optimised cost and approach for migrating your workloads to the AWS cloud. Insight's AWS HCA Assessment is a comprehensive service that includes workload migration assessment, consultative workshops, planning, and migration readiness assessment. By combining these services, we provide a complete and detailed analysis report that includes all the required information and fact-based data needed to create a business case and migration approach. This approach reduces the time and risk associated with a successful cloud migration.

Our service includes:

- Workload migration assessment delivered with multiple enterprise-class data collection and analysis tools.
- Full visibility of workloads, licensing requirements and optimised cost modelling.
- Application and dependencies - impact analysis.
- Consultative briefing & workshops covering business requirements, performance and uptime, SLA,
- network and security, compliance, and sustainability.

- Recommendation for database, data, and business continuity environments.
- A migration approach including tooling, modernisation Strategy, and recommended target architecture.
- Optional hands-on immersion day training session/s.
- Potential follow-on access to AWS PoC, MAP Mobilise, Migrate and Modernise incentives.

Is this solution right for you?

We have developed an expansive range of services to help you along the entire cloud journey to achieve your business objectives with AWS. By taking a comprehensive approach and using our deep, broad expertise, our services portfolio guides you towards a successful AWS adoption strategy, resulting in your IT team spending less time firefighting and more time creating business value.

Discover & Plan

We'll gain a full picture of your current and future requirements, exploring the right approach, and then plan how to realise the value through cost-effective solutions.

Build & Integrate

We can accelerate the deployment of your chosen solution, using our deep expertise and resources to seamlessly install and integrate the right technology.

Run & Innovate

Depending on your requirements, we can then help you optimise your AWS technology by supporting or managing it on your behalf.

AWS Competency Programme & Certifications

AWS established the AWS Competency Programme and certifications to help customers identify Consulting and Technology Partners with deep industry experience and expertise.

Competencies	Certifications
PARTNER: Migration Services Competency	PARTNER: Solution Provider
PARTNER: Security Services Competency	PARTNER: Advanced Tier Services
PARTNER: AWS Microsoft Workloads Services	PARTNER: Public Sector
PARTNER: DevOps Service Competency	PARTNER: AWS Marketplace Skilled Consulting
	PARTNER: Immersion Day
	PARTNER: Amazon EC2 for Windows Server Delivery
	PARTNER: Well-Architected Partner Program
