

Why Insight for System Center 2016?

Insight is Microsoft's largest global Licensing Solution Provider (LSP) and has been providing Microsoft® solutions for more than 25 years. As one of the first Microsoft LSPs and enterprise software advisors, we put Microsoft at the center of our end-to-end strategy to help businesses run smarter. We collaborate to deliver Intelligent Technology™ solutions that meet your strategic business needs and optimize your technology investments.

- 1,200+ on-staff consultants, architects and specialists
- Top 1% of all Microsoft services partners
- Microsoft Gold partner
- 55+ Microsoft Certified Systems Engineers (MCSEs)

How System Center 2016 will help your business

Cloud solutions have created opportunities for your business to develop a quick and agile infrastructure, but you also need to manage it all. You want a single system that meets a wide range of needs, manages a variety of platforms and supports on-premise and cloud resources.

Microsoft Windows® System Center 2016 meets those needs, providing you with the tools to oversee and control workloads, data and user access across the board. The most-trusted suite of system management tools was built for the modern data center, providing governance, automation and security.

Insight is your expert connection to Microsoft solutions that help your business run smarter.

Manage workloads, data and user access in one system.

Providing best-in-class security, policy-based access restrictions and many performance and stability improvements in automation, Microsoft® Windows® System Center 2016 delivers numerous benefits.

Task	Benefits
Configuration management	<ul style="list-style-type: none">• Deploy and manage Windows 10 and Windows Server® 2016.• Manage both network PCs and devices with a common set of tools.
Workload monitoring	<ul style="list-style-type: none">• Use new tools to manage storage quality of service.• Suspend resource monitoring during scheduled maintenance.• Gain increased support for non-Microsoft technologies.
Infrastructure provisioning	<ul style="list-style-type: none">• Use built-in workflows for deploying hosts and host clusters to easily build and manage virtual resources.• Guard virtualization hosts and protect virtual machines from attack.
Task automation	<ul style="list-style-type: none">• Automate more services, including run books and integration packs used in cloud migrations.• Instantly replicate primary builds into the Azure™ cloud.
Operations management	<ul style="list-style-type: none">• Use Microsoft's new Operations Management Suite.• Access end-to-end management of all on-site and cloud components.• Deliver orchestration, analytics, backup and recovery services to your network.
Licensing	<ul style="list-style-type: none">• Purchase licenses in two-core packs instead of two-processor packs.

How Insight will help

From the initial assessment to its deployment and administration, our team of experts will help you leverage the new management tools in System Center 2016.

Product and licensing specialists	Show you how the new technology and licensing changes can affect your organization and outline the costs involved.
Cloud specialists	Help you build a cloud or hybrid solution that meets your business goals, often at reduced cost.
Consultants and architects	Work with you to assess your current environment, create a plan for migration and execute on that plan on time and on budget.
