Optimize total cost of ownership

With the rise of PC device diversity, IT decision makers are faced with doing more with less: encouraging innovation, maintaining costs and ensuring devices are secure, reliable and updated with the latest operating systems.[1] Together, Dell and Intel® are offering solutions to optimize management, deployment and security.

Want to consolidate tools and boost security?

Consolidate Tools

56% of IT decision makers are looking for ways to Consolidate Tools[1]

Boost Security

Over 80% of IT decision makers feel Security is the most critical issue[1]

Mobile

Challenge

Mobile workforce devices such as laptops, tablets, and cell phones often pose security risks beyond an admin's control. When a mobile device is stolen or a third party tries to gain access, IT needs to make sure that the data on that device is safe, and that only authorized users can log in.

Dell Solution

Dell Data Protection | Encryption

Our enterprise edition encryption takes a data-centric approach to protecting data accessed on mobile devices without disrupting IT processes or workforce productivity.
