

# Hybrid Container Management With Azure Arc Strategy Workshop

## About this workshop

Remaining agile in today's evolving digital world means embracing hybrid, distributed solutions across multiple clouds, at the edge and in our data centers. But as organizations expand their digital footprint, managing disparate governance, workloads and deployments becomes increasingly complex — even for the most seasoned IT professionals.

Through this workshop, Insight's cloud experts will help your team understand the benefits of utilizing Azure® Arc to manage assets, workloads, security and governance across clouds and data centers. Our approach focuses on understanding your business objectives, then working together to create a baseline and set of goals to optimize your hybrid cloud strategy. We'll cover a variety of topics, including logging, monitoring, CI/CD and security, as well as how Azure Arc can integrate into your existing systems.

## Who should attend

C-suite business and technical decision-makers will gain a deeper understanding of how Azure Arc can help them achieve their cloud strategy and enablement objectives.

## Preparing for transformation

To ensure you receive the greatest value from this workshop, you will need:

- Participation from a group of five to 10 business leaders looking for change (CEO, CIO, CTO, CMO or other business technology leaders)
- Participation from leaders responsible for designing and architecting your enterprise IT systems and solutions
- Participation from engineering leaders who understand the infrastructure and licensing costs that factor into on-premises versus cloud economics
- A culture of cloud agility

## Workshop topics

During this workshop, Insight Digital Innovation's Azure and Azure Arc experts will cover a wide range of topics, including:

- How Azure Arc can help achieve hybrid cloud strategy and enablement objectives
- Defining actionable goals to address challenges and opportunities in your current hybrid cloud approach
- Formulating a targeted new hybrid cloud strategy and enablement plan
- Aligning your goals and objectives with Microsoft and industry best practices

### Duration

One day

### What to expect

- **Identify workloads** that can benefit from the Azure Arc platform.
- **Evaluate and optimize** your current and future hybrid cloud strategy.
- **Prioritize initiatives** that drive your hybrid cloud strategy.
- **Build a foundation** for your business's technical needs.
