Get the information you need to make informed decisions with Insight’s Enhanced Azure Fundamentals Envisioning Session.

Plan your move to the cloud with confidence

Did you know that Azure® has more than 100 different services? With terms like IaaS, PaaS, DevOps, BC/DR, AI, BI and the ever increasing cyberthreat, it can be difficult to know where to get started.

Insight’s Enhanced Azure Fundamentals Envisioning Session brings together the expertise of Insight’s Azure solution consultants and reporting from Block 64’s Azure workload identification. We provide your team with expert consultative guidance to help you make your decisions on your move to Microsoft® Azure at no cost to you.

What will the session cover?

• How the cloud is enabling innovation and digital transformation
• Understanding the cloud
• Infrastructure as a Service (IaaS) vs Platform as a Service (PaaS) vs Software as a Service (SaaS) — which is right for you?
• Common scenarios for the cloud
• Common workloads
• Hybrid cloud strategies
• A review of your organization’s Azure workload identification report from Block 64

What will you leave with?

• An understanding of the options available to you in Azure and the full Block 64 portfolio to help define your cloud journey.
• Clear and defined next steps and services Insight can provide to help your organization transition to modern cloud solutions.

Time commitment

Your customized session will last approximately 90 minutes, which includes 30 minutes of Q&A with a Microsoft expert.

Insight and Block 64: A powerful partnership

The journey to the cloud doesn’t have to be complicated, but it can be wrought with misinformation and noise. Insight, in partnership with Block 64, gives your team key information and documentation on your infrastructure’s cloud readiness and a plan to begin your journey.
