Business challenge

As a leader in five Gartner magic quadrants, Microsoft 365™ Security is the frontrunner in modern cloud security solutions. Implementing Microsoft 365 Security in your environment can improve your security posture, streamline security operations and remove redundancies in your security environment for significant cost savings.

However, Microsoft 365 Security requires knowledge and expertise to effectively manage. Does your organization have the skills and resources needed to implement and manage Microsoft 365 Security, including administration, ongoing updates, audit compliance, end-user security and more?

Our solution

Insight’s Managed Security for Compliance service is a complete solution for the management of Microsoft 365 Security, including implementation, update management, audit requirements and end-user security.

Business outcomes:

- Implement and continuously evaluate Microsoft 365 Security features in your environment.
- Maintain and improve your security posture to meet your compliance needs.
- Gain access to expert guidance for audit controls and reporting.
- Manage end-user security training and phishing simulation campaigns with the help of a trusted partner.

What’s included with Managed Security for Compliance?

- Operational support
- Reporting
- Biannual policy reviews
- Threat analytics
- Incident alerting
- BrainStorm® Threat Defense phishing simulator
- Audit control guidance and advocacy program for NIST 800, ISO 27001, CMMC and/or HITRUST
- E5 support – Includes support for E5 security features such as advanced threat hunting, identity protection, Azure® AD policy reviews and more
- End-User Security Program Management – An end-to-end solution to manage end-user security training and phishing simulation using BrainStorm’s Threat Defense Software as a Service (SaaS) solution

Train your workforce to avoid security risks.

**Insight’s End-User Security Program Management powered by BrainStorm Threat Defense: A better way to improve end-user security**

You care about your organization’s data security — but all the passwords in the world are no match for users who don’t understand the risks of their behavior. To ensure a more secure environment, you first have to educate your workforce.

We’ve partnered with BrainStorm to deliver a high-value security training and phishing simulation solution supported by the complete management of your end-user security program. Let Insight take the work out of your end-user security program by taking on the management of online training, phishing campaigns and reporting for you.

**Real results**

- 95% of users become aware of their shortcomings.
- +50% identify other areas where they can improve personal security.
- 94% of users change the way they evaluate email.

**Why Insight for Microsoft solutions?**

Insight’s strong supply chain optimization and workplace solutions combined with our data center transformation expertise and modernized applications keep business running, foster flexible work environments and put you at the forefront of innovation.
