Learn how to better secure your business with a Microsoft 365 Security Envisioning Session.

**Secure your business with tools from Microsoft**

The top security risk to organizations is not phishing, malware, ransomware or malicious attacks. The biggest threat to your organization is when you simply don't take the steps needed to ensure you're protected. Not doing so has potentially huge ramifications. The average cost of a breach worldwide is $3.92 million, though that number increases for U.S.-based businesses.¹

Insight’s Microsoft 365 Security Envisioning Session gives your organization the opportunity to discuss the impacts of the Microsoft 365™ security center with our Microsoft® consultants at no cost to you.

**What will the session cover?**

- What a move or upgrade to Microsoft 365 will mean for your organization
- How Microsoft 365 addresses modern security threats
  - Security features of Microsoft 365
  - Overview of Advanced Threat Protection (ATP)
  - Addressing mobile threats with Microsoft 365 and Azure® Active Directory® (AD)
- Review of Microsoft secure score and how to benchmark your security posture

**What will you leave with?**

- An understanding of the security tools available to you in Microsoft 365 and insights into how you might use them to protect your organization.
- Clear and defined next steps and services Insight can provide to help your organization transition to a Microsoft 365 solution.

**Time commitment**

Your customized session will last approximately 90 minutes, which includes 30 minutes of Q&A with a Microsoft expert.
