

Anti-Malware & Program Control

Efficiently detects and removes malware from endpoints with a single scan

Anti-Malware & Program Control

YOUR CHALLENGE

Threats such as malware, viruses, keystroke loggers, Trojans, and rootkits, and rouge programs are constantly changing. IT departments have to quickly adapt to new and emerging threats to prevent endpoints from becoming compromised and prevent corporate data from being put in the wrong hands. Remotely managing security software while not impacting the user experience poses additional challenges for IT teams.

PRODUCT DESCRIPTION

The Check Point Anti-Malware & Program Control Software Blade efficiently detects and removes malware from endpoints with a single scan. Viruses, spyware, keystroke loggers, Trojans and rootkits are identified using signatures, behavior blockers and heuristic analysis. Program control allows only approved programs to run on the endpoint and terminate not approved or untrusted programs. This software blade is easily managed by unified Endpoint Security Management.

OUR SOLUTION

Check Point Anti-Malware & Program Control prevents and stops threats such as mal-ware, viruses, keystroke loggers, Trojans, and root kits from entering and infecting endpoints. With fast malware scans and boot times, user experiences are not impacted thereby enhancing productivity time and reducing IT overhead. Check Point Anti-Malware & Program Control further reduces resource usage and cost by providing the capability to deploy and manage security software from a centrally managed console.

Minimal Impact and Footprint

- Minimal impact on endpoint systems by having the smallest memory and disk footprints along with the fastest malware and anti-virus scan and boot times.

Prevent Malware from Accessing Endpoints with a Single Scan

- Malware can be identified in a single scan via signatures, heuristics analysis, and behavior blockers. When an issue has been found, an administrator can take remedial action to prevent infection and damage to endpoints.

PRODUCT FEATURES

- Minimal resource usage and least intrusive user experience
- Comprehensive anti-malware and anti-virus protection in one program
- Program control ensures only legitimate, approved programs are allowed to run and perform tasks on endpoints. Non approved programs and untrusted programs can be blocked or terminated.
- Program control advisory provides the ability to check if a program is trusted or not in front of an always-updated cloud based service

PRODUCT BENEFITS

- Industry's fastest malware and anti-virus scan and boot time
- Prevents malware from accessing endpoints with a single scan
- Protection is automatically updated with the Program Advisor cloud based service
- Knowledge base of more than four million trusted or suspicious programs
- Integration with Check Point Software Blade Architecture for a single-console, centrally-managed endpoint solution.

Continuously Updated Program Advisory Cloud Database

- A knowledge base of more than one four million trusted or suspicious programs saves IT the headache of managing new programs that shouldn't be trusted.

Central Management

- The Anti-Malware and Program Control Software Blade is centrally managed by the Endpoint Policy Management Software Blade, enabling central policy administration, enforcement and logging from a single, user-friendly console.

Integrated into Check Point Software Blade

Architecture

- The Anti-Malware and Program Control Software Blade is fully integrated into the Software Blade architecture, saving time and reducing costs by allowing customers to quickly expand security protection while keeping a single client and simple user experience to meet changing requirements.
- Additional Endpoint Security Software Blades: Desktop Firewall and Compliance Check, WebCheck Browser Virtualization, Media Encryption and Port Protection, Full Disk Encryption and Remote Access VPN.

SOFTWARE BLADE SPECIFICATIONS

Client Platform Support

- Windows 7 (32 & 64-bit)
- Windows Vista (32 & 64-bit)
- Windows XP Pro (32-bit, SP2, SP3)

Client Language Support

- English
- Japanese
- French
- Italian
- German
- Chinese (simplified)
- Spanish
- Russian

Management Platform

ANTI-MALWARE SCANNING

Antivirus

- On-access Virus Scan** • Scans files as they are opened, executed or closed, allowing immediate detection and treatment of viruses
- Deep Scan** • Runs a detailed scan of every file on selected scan targets
- Scan Target Drives** • Specifies directories and file types to scan
- Scan Exclusions** • Specifies directories and file extensions excluded from scanning
- Treatment Options** • Choice of remediation: repair, rename, quarantine, delete

Anti-spyware

- Intelligent Quick Scan** • Checks the most common areas of the file system and registry for traces of spyware
- Full-system Scan** • Scans local file folders and specific file types
- Deep-inspection Scan** • Scans every byte of data on the computer
- Scan Target Drives** • Specifies which directories and file types to scan
- Scan Exclusions** • Specifies directories and file extensions excluded from scanning
- Treatment Options** • Choice of remediation: repair, rename, quarantine, delete
