

CHECK POINT NEXT GENERATION FIREWALL ACHIEVES HIGHEST SCORE IN SECURITY EFFECTIVENESS AND MANAGEMENT IN LATEST NSS LABS TEST

Check Point Also Receives Triple “Recommend” Rating from NSS Labs for Next Generation Firewall, Network Firewall, and IPS

OVERVIEW

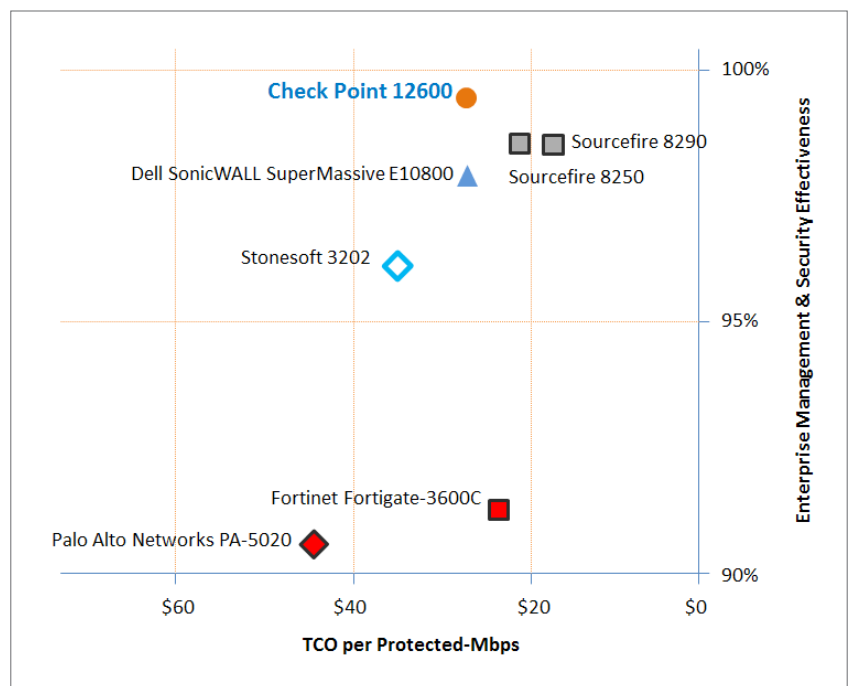

Check Point continues to excel in independent NSS Labs tests and achieved a triple “Recommend” ratings for its network security products. In the NSS Labs NGFW Group test, Check Point received top scores for Security Effectiveness and Overall Protection. Check Point also excelled in NSS Labs’ latest round of Network Firewall and Intrusion Prevention System (IPS) tests—earning a total of three “Recommend” ratings. As one of the highest scoring vendors across all three tests, Check Point’s outstanding results underscore the company’s long-standing track record of security leadership.

TOP SCORE FOR NEXT GENERATION FIREWALL

Check Point finished at the top in the Next Generation Firewall Test and scored an excellent 98.5% for Security Effectiveness—the top score given by NSS to all participating vendors. The test results show that Check Point’s next-generation firewall solution provides the best out-of-the-box protection in the industry.

Check Point NGFW—NSS Labs “Recommend”

- Highest Overall Score in Security Effectiveness and Management (98.5%)
- 100% Firewall Security
- 100% Application Control and Identity Awareness
- 100% Stability and Reliability
- Leader in the NGFW Security Value Map™ (SVM)
- Third Consecutive “Recommend” Rating

A PERFECT SCORE IN SECURITY AND MANAGEMENT FIREWALL TESTS

In the NSS Labs Firewall Group Test, Check Point achieved 100% for Security Effectiveness, Firewall Enforcement and Stability & Reliability in “Real-Word Protocol Mixes” and “21 KB HTTP Responses”. The Check Point 12600 Appliance with R75.40 Release delivered outstanding performance results while maintaining a low TCO of \$11.72 per protected Mbps.

Check Point Network Firewall—*NSS Labs “Recommend”*

- 100% Security Effectiveness
- 100% Firewall Security
- 100% Stability & Reliability
- 100% Management Compliance
- Leader in Network Firewall SVM
- Second Consecutive “Recommend” Rating

BEST OVERALL PROTECTION IN IPS TESTS

In the NSS Labs independent IPS Test, the Check Point 61000 with R75.40 Release achieved a near-perfect score of 99.0% for best overall protection. Once again, the Check Point IPS Software Blade performed exceptionally well continuing a tradition of strong performance in NSS Labs Network IPS tests.

In its final report, NSS Labs notes that “Resistance to known evasion techniques was perfect, with the Check Point 61000 IPS R75.4 achieving a 100% score across the board in all related tests. IP fragmentation, TCP stream segmentation, RPC fragmentation, URL obfuscation, HTML Evasion and FTP evasion all failed to trick the product into ignoring valid attacks. Not only were the fragmented and obfuscated attacks blocked successfully, but all of them were also decoded accurately.”

Check Point IPS—*NSS Labs “Recommend”*

- 99% Overall Protection
- 100% Resistance to Evasion
- Excellent Stability and Reliability
- Powerful & Easy-to-Use Management System

LONG STANDING RECORD OF EXCELLENCE IN NSS LABS TESTING

- 2013: The top score and a “Recommend” rating in Next Generation Firewall Group Test
- 2013: Once again finished with a top score and earned a “Recommend” rating in Firewall Group Test
- 2013: Scored a near-perfect 99.0% Overall Protection and a “Recommend” rating in independent IPS Test
- 2012: Achieved a top IPS score for overall protection and “Recommend” rating in the IPS Group Test
- 2011: First to pass NGFW test and receive “Recommend” rating for NGFW
- 2011: Excelled and earned a “Recommend” rating in the IPS Group Test
- 2011: Great results in the Firewall Group Test, only vendor to pass all tests on the first try

SUMMARY

Check Point has a long standing record of excellent performance in NSS Labs testing. NSS Labs’ comprehensive testing of the Check Point 12600 and 61000 Appliances with R75.40 demonstrates that excellence, earning top scores in the latest NSS Labs tests. This is one of the reasons why Check Point’s enterprise network security solutions are trusted by thousands of businesses worldwide.
